Future Earth: Advancing Civic Understanding of the Anthropocene (Geophysical Monograph Series)

Diana Dalbotten

Earth now is dominated by both biogeophysical and anthropogenic processes, as represented in these two images from a simulation of aerosols. Dust (red) from the Sahara sweeps west across the Atlantic Ocean. Sea salt (blue) rises into the atmosphere from winds over the North Atlantic and from a tropical cyclone in the Indian Ocean. Organic and black carbon (green) from biomass burning is notable over the Amazon and Southeast Asia. Plumes of sulfate (white) from fossil fuel burning are particularly prominent over northeastern North America and East Asia. If present trends of dust emissions and fossil fuel burning continues in what we call the Anthropocene epoch, then we could experience high atmospheric CO₂ levels leading to unusual warming rarely experienced in Earth's history. This book focuses on human influences on land, ocean, and the atmosphere, to determine if human activities are operating within or beyond the safe zones of our planet's biological, chemical, and physical systems.

Volume highlights include:

- Assessment of civic understanding of Earth and its future
- Understanding the role of undergraduate geoscience research and community-driven research on the Anthropocene
- Effective communication of science to a broader audience that would include the public, the K-12 science community, or populations underrepresented in the sciences
- Public outreach on climate education, geoscience alliance, and scientific reasoning

Future Earth is a valuable practical guide for scientists from all disciplines including geoscientists, museum curators, science educators, and public policy makers.

This volume was made possible with the support of the National Science Foundation through the National Center for Earth-surface Dynamics (EAR-0120914) and the Future Earth Initiative (DRL-0741760). Any opinions, findings, and conclusions or recommendations expressed in this publication are those of the author(s) and do not necessarily reflect the views of the National Science Foundation.

From reader reviews:

Sybil Davis:

What do you with regards to book? It is not important with you? Or just adding material when you need something to explain what you problem? How about your time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have spare time? What did you do? Every individual has many questions above. The doctor has to answer that question because just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on pre-school until university need this Future Earth: Advancing Civic Understanding of the Anthropocene (Geophysical Monograph Series) to read.

Peter Christensen:

This Future Earth: Advancing Civic Understanding of the Anthropocene (Geophysical Monograph Series) book is not really ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book will be information inside this guide incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. That Future Earth: Advancing Civic Understanding of the Anthropocene (Geophysical Monograph Series) without we recognize teach the one who examining it become critical in contemplating and analyzing. Don't end up being worry Future Earth: Advancing Civic Understanding of the Anthropocene (Geophysical Monograph Series) can bring whenever you are and not make your handbag space or bookshelves' become full because you can have it with your lovely laptop even cell phone. This Future Earth: Advancing Civic Understanding of the Anthropocene (Geophysical Monograph Series) having fine arrangement in word in addition to layout, so you will not truly feel uninterested in reading.

Palmer Schwartz:

People live in this new morning of lifestyle always try and and must have the spare time or they will get great deal of stress from both way of life and work. So , once we ask do people have free time, we will say absolutely indeed. People is human not just a robot. Then we request again, what kind of activity have you got when the spare time coming to you actually of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, the particular book you have read is definitely Future Earth: Advancing Civic Understanding of the Anthropocene (Geophysical Monograph Series).

Sherry Francis:

Many people spending their time by playing outside with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to spend your whole day by reading through a book. Ugh, do you consider reading a book can actually hard because you have to use the book everywhere? It all right you can have the e-book, having everywhere you want in your Cell phone. Like Future Earth:

Advancing Civic Understanding of the Anthropocene (Geophysical Monograph Series) which is getting the e-book version. So , try out this book? Let's notice.
