Testing Statistical Hypotheses (Springer Texts in Statistics)

Erich L. Lehmann, Joseph P. Romano

Testing Statistical Hypotheses (Springer Texts in Statistics) Erich L. Lehmann, Joseph P. Romano

The third edition of Testing Statistical Hypotheses updates and expands upon the classic graduate text, emphasizing optimality theory for hypothesis testing and confidence sets. The principal additions include a rigorous treatment of large sample optimality, together with the requisite tools. In addition, an introduction to the theory of resampling methods such as the bootstrap is developed. The sections on multiple testing and goodness of fit testing are expanded. The text is suitable for Ph.D. students in statistics and includes over 300 new problems out of a total of more than 760.

From reader reviews:

Roxie Spencer:

The actual book Testing Statistical Hypotheses (Springer Texts in Statistics) will bring that you the new experience of reading any book. The author style to spell out the idea is very unique. When you try to find new book to learn, this book very ideal to you. The book Testing Statistical Hypotheses (Springer Texts in Statistics) is much recommended to you to learn. You can also get the e-book through the official web site, so you can quicker to read the book.

Lisa Streeter:

The particular book Testing Statistical Hypotheses (Springer Texts in Statistics) has a lot info on it. So when you make sure to read this book you can get a lot of advantage. The book was compiled by the very famous author. The author makes some research before write this book. This kind of book very easy to read you can get the point easily after reading this book.

Dave Arreola:

Playing with family in a park, coming to see the sea world or hanging out with good friends is thing that usually you may have done when you have spare time, and then why you don't try issue that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Testing Statistical Hypotheses (Springer Texts in Statistics), you could enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh can happen its mind hangout people. What? Still don't buy it, oh come on its identified as reading friends.

Tommy Bowles:

As a student exactly feel bored to be able to reading. If their teacher asked them to go to the library or even make summary for some reserve, they are complained. Just tiny students that has reading's soul or real their hobby. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that studying is not important, boring and can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Testing Statistical Hypotheses (Springer Texts in Statistics) can make you experience more interested to read.
