Creatures from another time, volcanic mountains five million years old, Indian tribes surviving from the pre-Inca period, jungles and rainforests: Ecuador has all this and more. Only in its Galapagos Islands did Charles Darwin discover such a variety of extraordinary fauna that on his return to England he wrote his groundbreaking *On the Origin of Species*. With a philosophical yet humorous approach, Neville Shulman provides an in-depth background to Ecuador and its diverse peoples and tells intriguing stories of spectacular creatures and exotic flora, many not found anywhere else in the world.
