The Decision to Attack: Military and Intelligence Cyber Decision-Making (Studies in Security and International Affairs Ser.) Aaron Franklin Brantly

The debate over cyber technology has resulted in new considerations for national security operations. States find themselves in an increasingly interconnected world with a diverse threat spectrum and little understanding of how decisions are made within this amorphous domain.

With *The Decision to Attack*, Aaron Franklin Brantly investigates how states decide to employ cyber in military and intelligence operations against other states and how rational those decisions are. In his examination, Brantly contextualizes broader cyber decision-making processes into a systematic expected utility/rational choice approach to provide a mathematical understanding of the use of cyber weapons at the state level.

Discussed:

The Key Concepts of Cyber

The Motivation and Utility for Covert Action

Digital Power

Anonymity and Attribution in Cyberspace

Cyber and Conventional Operations:

The Dynamics of Conflict

Defining the Role of Intelligence in Cyberspace

How Actors Decide to Use Cyber-a Rational

Choice Approach

Cognitive Processes and Decision-Making

in Cyberspace

Finding Meaning in the Expected Utility of

International Cyber Conflict

From reader reviews:

Tatum Martin:

In this 21st millennium, people become competitive in every way. By being competitive today, people have to do something to make themselves survive, being in the middle of typically the crowded place and notice through the surrounding. One thing that oftentimes many people have underestimated this for a while is reading. That's why, by reading a book your ability to survive increases then having a chance to stay than others is high. In your case who want to start reading a book, we give you this *The Decision to Attack: Military and Intelligence Cyber Decision-Making (Studies in Security and International Affairs Ser.)* book as nice and daily reading e-book. Why, because this book is greater than just a book.

Naomi Taylor:

As people who live in the actual modern era should be change about what is going on or details even knowledge to make these individuals keep up with the era and that is always change and move forward. Some of you maybe will certainly update themselves by examining books. It is a good choice to suit your needs but the problems coming to you actually is you don't know what type you should start with. This *The Decision to Attack: Military and Intelligence Cyber Decision-Making (Studies in Security and International Affairs Ser.)* is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

Jeffrey Baptiste:

A lot of guides have been printed but it differs from the others. You can get it by internet on social media. You can choose the very best book for you, science, witty, novel, or whatever by searching for it. It is identified as the book *The Decision to Attack: Military and Intelligence Cyber Decision-Making (Studies in Security and International Affairs Ser.)*. You can contribute your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make you happier to read. It is most significant that, you must be aware about books. It can bring you from one location to another place.

Darlene Gutierrez:

Reading a review makes you to get more knowledge from the reviewer. You can take knowledge and information coming from a book. A book is prepared or printed or illustrated from each source this filled with update of news. Within this modern era like now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just in search of the *The Decision to Attack: Military and Intelligence Cyber Decision-Making (Studies in Security and International Affairs Ser.)* when you need it?
