Developing Intelligent Agents for Distributed Systems: Exploring Architectures, Techniques, and Applications Michael Knapik, Jay B. Johnson

This is a guide for software developers wanting to harness the power of agent software in client/server environments. An intelligent agent is a piece of software which searches for information, monitors conditions and performs particular actions. Often referred to as smart software, the agent continually "learns" about its environment and begins to repond accordingly. The book explains the programming of agents for improving user interfaces, increasing the performance of LANs and WANs, managing mail and even for assisting in the development of new software. In addition, the authors provide background on the technologies that make agents possible, such as AI, fuzzy logic and object technology. Common standards, such as COBRA and OLE, are discussed in the context of agents, along with the dark side of the technology, including "bots" and "rogue" agents which behave like viruses.

From reader reviews:

Maureen Jones:

Reading a book can be one of a lot of task that everyone in the world loves. Do you like reading book thus. There are a lot of reasons why people fantastic. First reading a reserve will give you a lot of new information. When you read a e-book you will get new information since book is one of several ways to share the information or perhaps their idea. Second, reading a book will make anyone more imaginative. When you reading through a book especially fictional works book the author will bring someone to imagine the story how the people do it anything. Third, it is possible to share your knowledge to other people. When you read this Developing Intelligent Agents for Distributed Systems: Exploring Architectures, Techniques, and Applications, you could tells your family, friends in addition to soon about yours guide. Your knowledge can inspire different ones, make them reading a book.

David Paras:

In this time globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of sources to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher that print many kinds of book. The actual book that recommended to you personally is Developing Intelligent Agents for Distributed Systems: Exploring Architectures, Techniques, and Applications this reserve consist a lot of the information from the condition of this world now. This kind of book was represented how do the world has grown up. The words styles that writer use to explain it is easy to understand. The particular writer made some analysis when he makes this book. Here is why this book appropriate all of you.

Terrie Newlin:

Do you like reading a guide? Confuse to looking for your best book? Or your book ended up being rare? Why so many issue for the book? But any people feel that they enjoy to get reading. Some people likes reading, not only science book but also novel and Developing Intelligent Agents for Distributed Systems: Exploring Architectures, Techniques, and Applications or maybe others sources were given know-how for you. After you know how the truly amazing a book, you feel desire to read more and more. Science guide was created for teacher as well as students especially. Those ebooks are helping them to add their knowledge. In additional case, beside science reserve, any other book likes Developing Intelligent Agents for Distributed Systems: Exploring Architectures, Techniques, and Applications to make your spare time more colorful. Many types of book like here.

Valery Carpenter:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from your book. Book is written or printed or illustrated from each source that will filled update of news.

Within this modern era like currently, many ways to get information are available for you actually. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just trying to find the Developing Intelligent Agents for Distributed Systems: Exploring Architectures, Techniques, and Applications when you essential it?
