Global Nature, Global Culture (Gender, Theory and Culture Series) Sarah Franklin, Celia Lury, Jackie Stacey

`An excellent book. The authors have the rare capacity to handle popular culture and case studies in a theoretically informed manner. Original and well researched' - *Mike Featherstone, Nottingham Trent University*

Understandings of globalization have been little explored in relation to gender or related concerns such as identity, subjectivity and the body. This book contrasts `the natural' and `the global' as interpretive strategies, using approaches from feminist cultural theory. The book begins by introducing the central themes: ideas of the natural; questions of scale and context posed by globalization and their relation to forms of cultural production; the transformation of genealogy; and the emergence of interest in definitions of life and life forms.
