Modeling of Material Damage and Failure of Structures: Theory and Applications (Foundations of Engineering Mechanics) Jacek Skrzypek, Artur Ganczarski

An extensive and comprehensive survey of one- and three-dimensional damage models for elastic and inelastic solids. The book not only provides a rich current source of knowledge, but also describes examples of practical applications, numerical procedures, and computer codes. The style throughout is systematic, clear, and concise, and supported by illustrative diagrams. The state of the art is given by some 200 references.
