Caveolins and Caveolae: Roles in Signaling and Disease Mechanisms (Advances in Experimental Medicine and Biology)

Caveolins and Caveolae: Roles in Signaling and Disease Mechanisms (Advances in Experimental Medicine and Biology)

Caveolae are 50-100 nm flask-shaped invaginations of the plasma membrane that are primarily composed of cholesterol and sphingolipids. Using modern electron microscopy techniques, caveolae can be observed as omega-shaped invaginations of the plasma membrane, fully-invaginated caveolae, grape-like clusters of interconnected caveolae (caveosome), or as transcellular channels as a consequence of the fusion of individual caveolae. The caveolin gene family consists of three distinct members, namely Cav-1, Cav-2 and Cav-3. Cav-1 and Cav-2 proteins are usually co-expressed and particularly abundant in epithelial, endothelial, and smooth muscle cells as well as adipocytes and fibroblasts. On the other hand, the Cav-3 protein appears to be muscle-specific and is therefore only expressed in smooth, skeletal and cardiac muscles. Caveolin proteins form high molecular weight homo- and/or hetero-oligomers and assume an unusual topology with both their N- and C-terminal domains facing the cytoplasm.

From reader reviews:

Kim Scott:

Reading can be called brain hangout, why? Because when you find yourself reading a book specially book entitled Caveolins and Caveolae: Roles in Signaling and Disease Mechanisms (Advances in Experimental Medicine and Biology) your mind will drift away through every dimension, wandering in every single aspect that maybe unidentified for but surely can become your mind friends. Imagining just about every word written in a publication then become one contact form conclusion and explanation in which maybe you never get prior to. The Caveolins and Caveolae: Roles in Signaling and Disease Mechanisms (Advances in Experimental Medicine and Biology) giving you one more experience more than blown away your thoughts but also giving you useful information for your better life in this particular era. So now let us demonstrate the relaxing pattern here is your body and mind is going to be pleased when you are finished examining it, like winning a. Do you want to try this extraordinary spending spare time activity?

Daniel Slater:

Do you have something that you like such as book? The book lovers usually prefer to select book like comic, limited story and the biggest the first is novel. Now, why not attempting Caveolins and Caveolae: Roles in Signaling and Disease Mechanisms (Advances in Experimental Medicine and Biology) that give your entertainment preference will be satisfied by reading this book. Reading addiction all over the world can be said as the means for people to know world better then how they react in the direction of the world. It can't be stated constantly that reading habit only for the geeky individual but for all of you who wants to always be success person. So , for all of you who want to start examining as your good habit, you are able to pick Caveolins and Caveolae: Roles in Signaling and Disease Mechanisms (Advances in Experimental Medicine and Biology) become your current starter.

Allen Green:

Reading a book to become new life style in this year; every people loves to go through a book. When you examine a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, along with soon. The Caveolins and Caveolae: Roles in Signaling and Disease Mechanisms (Advances in Experimental Medicine and Biology) provide you with new experience in examining a book.

Merle Poteet:

In this period of time globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, newspaper,

book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The actual book that recommended to you personally is Caveolins and Caveolae: Roles in Signaling and Disease Mechanisms (Advances in Experimental Medicine and Biology) this book consist a lot of the information from the condition of this world now. This kind of book was represented how can the world has grown up. The words styles that writer use for explain it is easy to understand. Typically the writer made some analysis when he makes this book. That's why this book ideal all of you.
