## **Motion Correction in Thoracic Positron Emission Tomography (SpringerBriefs in Electrical and Computer Engineering)**

Fabian Gigengack, Xiaoyi Jiang, Mohammad Dawood, Klaus P. Schäfers  
Respiratory and cardiac motion leads to image degradation in Positron Emission Tomography (PET), which impairs quantification. In this book, the authors present approaches to motion estimation and motion correction in thoracic PET. The approaches for motion estimation are based on dual gating and mass-preserving image registration (VAMPIRE) and mass-preserving optical flow (MPOF). With mass-preservation, image intensity modulations caused by highly non-rigid cardiac motion are accounted for. Within the image registration framework different data terms, different variants of regularization and parametric and non-parametric motion models are examined. Within the optical flow framework, different data terms and further non-quadratic penalization are also discussed. The approaches for motion correction particularly focus on pipelines in dual gated PET. A quantitative evaluation of the proposed approaches is performed on software phantom data with accompanied ground-truth motion information. Further, clinical applicability is shown on patient data. The book concludes with an outlook of recent developments and potential future advances in the field of PET motion correction.

**From reader reviews:**

**Marcus Galvan:**

As people who live in the actual modest era should be up-date about what going on or data even knowledge to make all of them keep up with the era which can be always change and move forward. Some of you maybe will certainly update themselves by examining books. It is a good choice for yourself but the problems coming to anyone is you don't know what one you should start with. This Motion Correction in Thoracic Positron Emission Tomography (SpringerBriefs in Electrical and Computer Engineering) is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

**Gerard Pucci:**

This Motion Correction in Thoracic Positron Emission Tomography (SpringerBriefs in Electrical and Computer Engineering) are reliable for you who want to be a successful person, why. The reason of this Motion Correction in Thoracic Positron Emission Tomography (SpringerBriefs in Electrical and Computer Engineering) can be one of the great books you must have is giving you more than just simple examining food but feed an individual with information that perhaps will shock your prior knowledge. This book is handy, you can bring it almost everywhere and whenever your conditions at e-book and printed people. Beside that this Motion Correction in Thoracic Positron Emission Tomography (SpringerBriefs in Electrical and Computer Engineering) forcing you to have an enormous of experience like rich vocabulary, giving you trial of critical thinking that we all know it useful in your day exercise. So , let's have it and luxuriate in reading.

**Lenore Cortez:**

Reading can called imagination hangout, why? Because if you are reading a book specially book entitled Motion Correction in Thoracic Positron Emission Tomography (SpringerBriefs in Electrical and Computer Engineering) your head will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely can be your mind friends. Imaging each and every word written in a reserve then become one form conclusion and explanation that will maybe you never get ahead of. The Motion Correction in Thoracic Positron Emission Tomography (SpringerBriefs in Electrical and Computer Engineering) giving you a different experience more than blown away the mind but also giving you useful details for your better life with this era. So now let us explain to you the relaxing pattern is your body and mind will likely be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary paying spare time activity?

**Peggy Elmore:**

As a student exactly feel bored for you to reading. If their teacher questioned them to go to the library or to

make summary for some reserve, they are complained. Just minor students that has reading's spirit or real their passion. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that looking at is not important, boring and can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Motion Correction in Thoracic Positron Emission Tomography (SpringerBriefs in Electrical and Computer Engineering) can make you experience more interested to read.
