SOCIAL PROBABILITY THEORY, HISTORICAL AND NATURAL OBSERVATIONS:: Know the Past to Understand the Present and to Predict the Future! Dr. Rose Sabina Griffith Hunte
The social probability theories, and historical & natural observations contained in this book were developed over many years and others are based on observations and current events in history. I have also included two new products I discovered while living in my native country of Saint Lucia. Additionally, I review the world, its beauty, and its history. Humanity has reached a milestone. While in Saint Lucia, I noted several alien sightings and have shared my observations of these sightings through this book. I reviewed many natural and historical observations, have looked at the world, and saw the wonder it contains. The reader will see references to "Mind Probe technology" This technology is used by governments with the technology to conduct systematic checks on people of interest. I became aware of the technology while living in Saint Lucia because of the alien sightings, I witnessed and the conclusions I drew from those sightings. It is imperative that, as a society, we do not perceive these alien visitors as a threat. It is my summation that they can be the harbingers of great technology and enhanced medical care that will benefit humanity. I hope that with the writing of this book, the scientific community and committee that discusses these phenomena will welcome me as a member because I believe I can contribute greatly to their investigation of the alien presence that I surmise have been visiting earth for thousands if not millions of years.
