Pharmacogenomics, the study of the role of genetics in drug response, has developed into a critical new area in battling disease and improving outcomes. As our knowledge of the human genome grows, and with the advent of next-generation sequencing technologies, the role of genetic research is evolving to guide therapy and prevent many diseases and mitigate side-effects of current treatments. As a pivotal member of the healthcare team, nurses must acquire competency in pharmacogenomics to deliver optimal patient care in the 21st century.

Mastering Pharmacogenomics provides nursing professionals with a foundational knowledge of human genetics and genomics that can be applied in optimizing drug therapy and patient care delivery. Coverage includes:

- Essential pharmacogenomics competencies for registered nurses
- Genomics technologies and resources
- Critical properties of drug response and disposition
- Covered specialties include obstetrics and prenatal patients, pediatrics, older adult patients, and oncology
- Ethics and patient care
- Future developments in technology and delivery
