Applying Generalized Linear Models (Springer Texts in Statistics)

James K. Lindsey

Applying Generalized Linear Models (Springer Texts in Statistics) James K. Lindsey

This book describes how generalised linear modelling procedures can be used in many different fields, without becoming entangled in problems of statistical inference. The author shows the unity of many of the commonly used models and provides readers with a taste of many different areas, such as survival models, time series, and spatial analysis, and of their unity. As such, this book will appeal to applied statisticians and to scientists having a basic grounding in modern statistics. With many exercises at the end of each chapter, it will equally constitute an excellent text for teaching applied statistics students and non- statistics majors. The reader is assumed to have knowledge of basic statistical principles, whether from a Bayesian, frequentist, or direct likelihood point of view, being familiar at least with the analysis of the simpler normal linear models, regression and ANOVA.

From reader reviews:

Ruth Cook:

Have you spare time for any day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity regarding spend your time. Any person spent their particular spare time to take a move, shopping, or went to the Mall. How about open as well as read a book allowed Applying Generalized Linear Models (Springer Texts in Statistics)? Maybe it is being best activity for you. You recognize beside you can spend your time with your favorite's book, you can better than before. Do you agree with their opinion or you have various other opinion?

Jessica Jennings:

The book Applying Generalized Linear Models (Springer Texts in Statistics) can give more knowledge and information about everything you want. So why must we leave the great thing like a book Applying Generalized Linear Models (Springer Texts in Statistics)? A few of you have a different opinion about e-book. But one aim this book can give many facts for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or details that you take for that, you may give for each other; you are able to share all of these. Book Applying Generalized Linear Models (Springer Texts in Statistics) has simple shape however you know: it has great and big function for you. You can appearance the enormous world by open and read a guide. So it is very wonderful.

Matthew Schwartz:

Your reading sixth sense will not betray a person, why because this Applying Generalized Linear Models (Springer Texts in Statistics) guide written by well-known writer whose to say well how to make book which can be understand by anyone who all read the book. Written with good manner for you, leaking every ideas and writing skill only for eliminate your own personal hunger then you still hesitation Applying Generalized Linear Models (Springer Texts in Statistics) as good book not simply by the cover but also by the content. This is one reserve that can break don't ascertain book by its cover, so do you still needing another sixth sense to pick that!?! Oh come on your looking at sixth sense already alerted you so why you have to listening to another sixth sense.

Patrick Bergeron:

It is possible to spend your free time to learn this book this e-book. This Applying Generalized Linear Models (Springer Texts in Statistics) is simple bringing you can read it in the area, in the beach, train as well as soon. If you did not include much space to bring the particular printed book, you can buy the e-book. It is make you quicker to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.
