**Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics)** D. Bailin, Alexander Love

Cosmology in Gauge Field Theory and String Theory focuses on the cosmological implications of the gauge theories of particle physics and of string theory.

The book first examines the universe's series of phase transitions in which the successive gauge symmetries of the higher-temperature phase were spontaneously broken after the big bang, discussing relics of these phase transitions, more generic relics (baryons, neutrinos, axions), and supersymmetric particles (neutralinos and gravitinos). The author next studies supersymmetric theory, supergravity theory, and the constraints on the underlying field theory of the universe's inflationary era. The book concludes with a discussion of black hole solutions of the supergravity theory that approximates string theory at low energies and the insight that string theory affords into the microscopic origin of the Bekenstein-Hawking entropy.

Cosmology in Gauge Field Theory and String Theory provides a modern introduction to these important problems from a particle physicist's perspective. It is intended as an introductory textbook for a first course on the subject at a graduate level.

### **From reader reviews:**

#### **Sheila Cyr:**

This Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) book is just not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book will be information inside this e-book incredible fresh, you will get details which is getting deeper anyone read a lot of information you will get. This specific Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) without we realize teach the one who reading it become critical in pondering and analyzing. Don't always be worry Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) can bring once you are and not make your case space or bookshelves' come to be full because you can have it within your lovely laptop even telephone. This Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) having good arrangement in word along with layout, so you will not really feel uninterested in reading.

#### **Marcus Laws:**

Do you among people who can't read enjoyable if the sentence chained within the straightway, hold on guys this particular aren't like that. This Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) book is readable by you who hate the perfect word style. You will find the information here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to supply to you. The writer of Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) content conveys the thought easily to understand by many individuals. The printed and e-book are not different in the articles but it just different in the form of it. So , do you even now thinking Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) is not loveable to be your top checklist reading book?

#### **Catherine Riddle:**

The feeling that you get from Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) is a more deep you rooting the information that hide inside words the more you get serious about reading it. It doesn't mean that this book is hard to know but Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) giving you enjoyment feeling of reading. The author conveys their point in specific way that can be understood simply by anyone who read the item because the author of this reserve is well-known enough. That book also makes your vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We recommend you for having this kind of Cosmology in Gauge Field Theory and String Theory (Graduate Student Series in Physics) instantly.

#### **Nicholas Ko:**

Are you kind of active person, only have 10 as well as 15 minute in your moment to upgrading your mind

skill or thinking skill actually analytical thinking? Then you have problem with the book when compared with can satisfy your short period of time to read it because this time you only find publication that need more time to be examine. *Cosmology in Gauge Field Theory and String Theory* (Graduate Student Series in Physics) can be your answer mainly because it can be read by an individual who have those short time problems.
