Energy Economics: Markets, History and Policy

Roy L. Nersesian

Energy Economics: Markets, History and Policy Roy L. Nersesian

Three quarters of our current electricity usage and transport methods are derived from fossil fuels and yet within two centuries these resources will dry up. *Energy Economics* covers the role of each fossil and renewable energy source in today's world, providing the information and tools that will enable students to understand the finite nature of fossil fuels and the alternative solutions that are available.

This textbook provides detailed examinations of key energy sources – both fossil fuels and renewables including oil, coal, solar, and wind power – and summarises how the current economics of energy evolved. Subsequent chapters explore issues around policy, technology and the possible future for each type of energy. In addition to this, readers are introduced to controversial topics including fracking and global warming in dedicated chapters on climate change and sustainability.

Each chapter concludes with a series of tasks, providing example problems and projects in order to further explore the proposed issues. An accompanying companion website contains extensive additional material on the history of the major types of fuel as well as technical material relating to oil exploration, the development of solar power and historical environmental legislation.

This textbook is an essential text for those who study energy economics, resource economics or energy policy.

From reader reviews:

Ronald Hill:

Book is usually written, printed, or descriptive for everything. You can realize everything you want by a reserve. Book has a different type. We all know that that book is important factor to bring us around the world. Close to that you can your reading ability was fluently. A e-book Energy Economics: Markets, History and Policy will make you to always be smarter. You can feel far more confidence if you can know about every thing. But some of you think this open or reading a new book make you bored. It's not make you fun. Why they might be thought like that? Have you looking for best book or appropriate book with you?

Larry Valadez:

Does one one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Attempt to pick one book that you never know the inside because don't judge book by its include may doesn't work at this point is difficult job because you are afraid that the inside maybe not while fantastic as in the outside look likes. Maybe you answer is usually Energy Economics: Markets, History and Policy why because the wonderful cover that make you consider with regards to the content will not disappoint an individual. The inside or content is actually fantastic as the outside or even cover. Your reading sixth sense will directly guide you to pick up this book.

Pedro Murray:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library or to make summary for some publication, they are complained. Just little students that has reading's soul or real their hobby. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that studying is not important, boring and also can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Energy Economics: Markets, History and Policy can make you sense more interested to read.

Martin Dowling:

What is your hobby? Have you heard that question when you got college students? We believe that that query was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And also you know that little person such as reading or as looking at become their hobby. You need to know that reading is very important and also book as to be the point. Book is important thing to increase you knowledge, except your current teacher or lecturer. You get good news or update in relation to something by book. Different categories of books that can you decide to try be your object. One of them is niagra Energy Economics: Markets, History and Policy.
